Round da Church... Does anybody remember a song called “Baby It’s Cold Outside?” It was originally written in 1944. Well, fast forward to February 1, 2026. When heat is at a premium with temperatures in the 20’s and wind-chills in the negative teens...it’s the trustee’s tearing apart a heating unit to replace the heat exchanger tube that has rusted through after a mere 35+ years of service. After a 3 hour R & R “removal and replacement” the heat is on!!

The most unusual part about this project was, it didn’t start with breakfast.
